Profile Summary

I am a final-year Computer Science undergraduate (2026 batch) with a strong foundation in problem-solving and software engineering principles. Over the past few years, I've gained hands-on experience in full-stack development using the MERN stack, including building RESTful APIs, designing databases, and implementing frontend and backend logic. I enjoy contributing across the software development lifecycle, ensuring solutions are scalable, reliable, and maintainable, while continuously learning emerging technologies and collaborating on impactful projects.

Education

Maharaj Vijayaram Gajapathi Raj College of Engineering (A) Nov 2022 – May 2026
Bachelor of Technology in Computer Science Engineering — CGPA: **8.51** Vizianagaram, Andhra Pradesh

Technical Skills

Programming Languages: C, C++, Java, Python, JavaScript (ES6+), TypeScript
Frontend: HTML5, CSS3, React.js, Redux, Tailwind CSS, EJS, Responsive Design
Backend: Node.js, Express.js, REST APIs, JWT, Retrieval-Augmented Generation (RAG)
Databases: PostgreSQL, MySQL, MongoDB, Redis
Tools & Technologies: Git, GitHub, Docker, Postman, n8n, Vercel, Render
Core Concepts: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems (DBMS), Operating Systems, Software Development Life Cycle (SDLC)

Experience

EduSkills | *Full Stack Developer Intern* Apr 2025 – Jun 2025

- Built **Easy Bookings**, a full-stack property rental platform enabling users to list, browse, and review properties.
- Implemented role-based access control, ensuring only property owners could edit or delete listings, and only review authors could delete their own reviews.

Projects

Smart Recruiter | *React.js, TypeScript, Node.js, Express.js, PostgreSQL, Redis* | GitHub Nov 2025 – Jan 2026

- Built an AI-powered voice interview platform that automated role-based candidate screening, reducing recruiter screening time by approximately 40–60%.
- Implemented Redis caching for frequently accessed data, significantly reducing API latency and improving backend scalability.

Legal Assistant | *React.js, Tailwind CSS, Node.js, Express.js, n8n* | GitHub Mar 2025

- Developed an AI-powered legal assistant in under 24 hours that allows users to upload legal documents and receive contextual answers through a chat interface, which helps in simplifying legal documents for non-experts.
- Architected a custom RAG pipeline using n8n for PDF ingestion, semantic chunking, vector embedding, and context-aware retrieval.

Perfect Resume | *React.js, Redux, Node.js, Express.js, MongoDB* | GitHub Dec 2024 – Feb 2025

- Designed a resume builder application that allows users to create, preview, and download professional resumes.
- Reduced manual data-entry by 70% by integrating LinkedIn profile scraping via RapidAPI for seamless resume pre-population.

Certifications

- Web Full Stack Development Certification** — EduSkills
- SQL and Relational Databases 101** — Cognitive Class (IBM)
- Elite + Silver Medal in Cloud Computing examination** — NPTEL

Achievements

- Secured Top 13 position among 200+ teams** at the Visionova Hackathon (Anurag University, 2025) by developing an innovative full-stack AI solution under strict time constraints.
- Earned a **5-star rating in Java** on **HackerRank**, demonstrating strong object-oriented programming proficiency.
- Solved **150+ Data Structures and Algorithms** problems on **LeetCode**
